

MISSION PACKS: UPDATE LOG

Rules will be periodically updated to maintain fair balance and interact more smoothly with the game. Rules changes will be updated directly into online documents and then listed below. Any minor changes to standardise wording that don't have any practical impact on the rule will be updated directly into online documents but not be listed here.

NEMESIS OPERATIVES

RULES COMMENTARY

AUGUST '26

This section provides clarification on ambiguous and complex rules interactions.

Q: *Do custom **NEMESIS** operatives always need the Towering Size rule, or can it be removed (as it is with the **AMBULL** and **ARCHIVIST** NPOs)?*

A: In almost all instances, the Towering Size rule should be used. You may find with some Small **NEMESIS** operatives that the Towering Size rule is not necessary, but it is recommended even in these instances to disallow that operative from being given a Conceal order, and to allow it to be selected as a valid target even within control range of other operatives.
